

POST-EDGE™ IS THE MOST BIOAVAILABLE & SAFE PROTEIN FORMULA ON THE MARKET*

✓ 3 Phase Tested

✓ NO Proprietary Blends

✓ NO Fillers, Additives or Dyes

✓ NO Complexes or Concentrates

✓ NO Corn Syrup Solids

✓ NO Banned Substances/GMOs

✓ Clinically Effective Doses

✓ Gourmet Taste

✓ No Amino Spiking

✓ Gluten Free

✓ Lactose Free

✓ Aspartame Free

THE ONLY LOW-CARB ALL-IN-ONE POST-WORKOUT SOLUTION FOR BOTH MALE AND FEMALE ATHLETES

LIONEDGE NATION: JOIN THE PRIDE

LionEdge Nutrition™ is committed and dedicated to the principles of innovation, research, affordability, transparency and quality. Physician-owned and formulated, LionEdge Nutrition™ provides 100% transparency with medically researched & established explanations for every ingredient used. Whether you are an athlete serious about seeing significant gains in strength and lean muscle mass or simply searching for a nutritious low carb meal replacement supplement striving for a lean figure, **POST-EDGE™** is your perfect solution*. Over-hyped and overpriced post workout supplements loaded with dangerous fillers/proprietary blends have had their day. Supported by over 10 licensed physicians and over 200 referenced studies, **POST-EDGE™** promises to deliver to you the most powerful, effective, safe, and complete post workout formula on the market*. In a supplement filled jungle, LionEdge is king! To Healthy Training.

POST-EDGE™ REPLACES 9 PRODUCTS IN 1: A TOTAL VALUE OF \$195

PLEASE VISIT LIONEDGENUTRITION.COM FOR FULL INCLUSIVE PROFILES SUPPORTED BY OVER 200 REFERENCED STUDIES

1. 27.4g Protalyn® Whey Protein Isolate (VALUE OF \$50)
"Multi-phase protein" blends are a marketing tactic where supplement companies include minimal amounts of quality protein and load products with cheap protein concentrates and/or junk fillers to cut costs. **POST-EDGE™** is the only all-in-one post workout formula that utilizes Protalyn®, a cold processed ultra-microfiltered enzymatic alkalized Whey Protein Isolate, which has the highest amount of BCAAs, is most rapidly absorbed and increases protein synthesis greater than any other athlete*. When lactate is the purest, most superior and efficient form of protein, which has actually been shown in research to help promote fat loss. Whey concentrates can be as low as 25% protein by weight comparing to a minimum of 90% protein in whey isolates.

2. 1.5g Kre-Alkalyn® (Buffered Creatine Monohydrate) (VALUE OF \$15)
Creatine increases muscle growth, strength, and recovery*. Kre-Alkalyn® is a 100% stable, multi-patented, pH-buffered (pH-12) creatine monohydrate. It is more soluble, results in less GI distress and water retention and has a much lower recommended dosage in comparison to creatine monohydrate. In a double-blind clinical study comparing Kre-Alkalyn® to creatine monohydrate, the Kre-Alkalyn® group experienced an overall average strength increase of 28.25% above those in the unbuffered creatine monohydrate group. Our competitors prefer to sell creatine monohydrate since it is much cheaper to manufacture.

3. 7.5g Branched Chain Amino Acids (w/ added Leucine) (VALUE OF \$25)
BCAAs (particularly leucine) increase the rate and the cell's capacity for protein and glycogen synthesis, aiding in muscle recovery and growth, lean mass, and fat loss*. Post-Edge™ is the only post workout supplement on the market that supplies BCAAs in a 4:1:1 ratio with added leucine to further maximize results*. Additionally, our added fermented leucine undergoes a 100% vegan fermentation process while most BCAAs on the market are made from a cheaper manufacturing process from duck feathers and human hair.

4. 3g Fermented L-Glutamine (VALUE OF \$20)
L-glutamine is a crucial amino acid for building muscle and in muscle tissue repair by increasing protein/BCAA synthesis, hydration, exercise performance and recovery. Glutamine becomes greatly depleted during training, which can decrease muscle strength, stamina, recovery, and overall immunity if not adequately restored. **POST-EDGE™** includes the most bio-available glutamine on the market*.

5. 1.3g Post-Edge™ Insulin Activation Anabolic Matrix (VALUE OF \$35)
LionEdge Nutrition™ has developed the world's most scientifically advanced, clinically dosed low carbohydrate (3g Net Carbs), Insulin Anabolic Activation Matrix, exclusive to **POST-EDGE™**. Insulin is a natural, anabolic hormone that drives nutrients into the cells of hungry muscle fibers, such as BCAAs, creatine, glutamine and carnitine. Coupled with LAM, this allows increased absorption into systemic circulation prior to degradation in the liver, to help promote significant increases in lean muscle mass, strength and recovery*.

6. 2g Fermented Betaine Anhydrous (Trimethylglycine) (VALUE OF \$10)
Numerous studies have found that Betaine leads to an improved sense of well-being, greater strength and endurance during recovery, and an increase in overall aerobic and anaerobic athletic performance, enhancing muscle power and strength (mainly in squats & bench press)*.

7. 2g LIONEDGE Absorption Matrix (LAM) (VALUE OF \$10)
Exclusive to LionEdge Nutrition™, LAM is the most powerful and advanced absorption enhancing matrix on the market. Featuring 2 patented ingredients - Velositol® and Bioperine®, absorption of key ingredients in **POST-EDGE™** are significantly enhanced and MPS (muscle protein synthesis) is doubled, allowing a further increase in fat loss, lean muscle mass, strength, recovery and immunity*.

8. 1.6g Anti-Inflammatory Matrix (VALUE OF \$20)
Up to several days following a workout, muscle fibers undergo micro trauma and an ongoing recovery process that can actually make them weaker until fully recovered. The ingredients in **POST-EDGE™** Anti-Inflammatory Matrix have been clinically shown to result in reduction in muscle pain and soreness as well as joint pain and stiffness, allowing you to recover faster and to workout longer and stronger*.

9. 1.4g Electrolyte Support Matrix (VALUE OF \$10)
During intense prolonged exercise, athletes can lose 1500mg to 3000mg of electrolytes per hour. **POST-EDGE™** is formulated to help rehydrate the body after intense exercise for optimal performance*.

INGREDIENTS: Protalyn® (Cold-Microfiltered Enzymatic Alkalized Whey Protein Isolate), L-Glutamine, L-Leucine, Velositol®, Trimethylglycine (Betaine), Kre-Alkalyn®, Kre-Celazine®, Cocoa, L-Carnitine Tartrate, Magnesium Oxide, Natural and Artificial Flavors, Coconut Water, Xanthan Gum, Alpha Lipoic Acid, Sucralose, Cinnamon Bark, Ginger Root, Bromelain, Acesulfame Potassium, BioPerine, Vitamin D3, Stevia Extract

Directions: As a dietary supplement, mix 1 serving (1 heaping scoop) of **POST-EDGE™** with 6-10 oz of cold water. Consider adding a small amount of milk for thicker texture. On workout days, mix 1 heaping scoop within 60 minutes after workout. On non-workout days, mix 1 heaping scoop between meals.

VELOSITOL® DOUBLE THE POWER OF YOUR PROTEIN!

KRE-ALKALYN THE MOST POWERFUL AND STABLE CREATINE!
